

# PRESS RELEASE

## CEMLink™ “Turns 10”

JUNE 2001

**Hanover, MD** – VIM Technologies, Inc is celebrating 10 years of development in compliance data acquisition and handling systems. Our fourth generation product **CEMLink™4** offers ease of use and a flexible, site-specific design that meets the reporting and data management demands of all air compliance regulations. This fully compliant product provides the end user with all the tools needed to gain ready access to time critical data, on demand. **CEMLink™4** is the Data Acquisition System (DAS) of choice for PLC-based, CEMS reporting applications, including: Acid Rain sources, OTC NOx Budget, 40CFR Part 60 and MACT Standards. Using either a Windows NT or Windows 2000 operating system, **CEMLink™4** provides the simple solution to your data access needs. Operating as a stand alone DAS or in conjunction with a local or wide area network, it is a robust, mature product designed with your reporting needs in mind.

**CEMLink™4** fully complies with 40CFR Part 60, 40CFR Part 75, associated Subparts & Appendices, State and local regulations and air compliance programs. We are currently accepting orders for the NOx SIP Call and the Combustion Turbine Market, regulated under the Acid Rain program. **CEMLink™4** connects you to your data. For more information about **CEMLink™4** contact VIM Technologies, Inc. at [viminfo@vimtechnologies.com](mailto:viminfo@vimtechnologies.com) or call Matt Radigan at (781) 821-2376 to set up a site assessment or product demonstration. **CEMLink™4** is the only data acquisition system that you will ever need.
