

**Overview**

VIM Technologies, Inc. is pleased to announce the next generation in compliance Data Acquisition System software with the release of our fifth generation product – **CEMLink™ 5**.

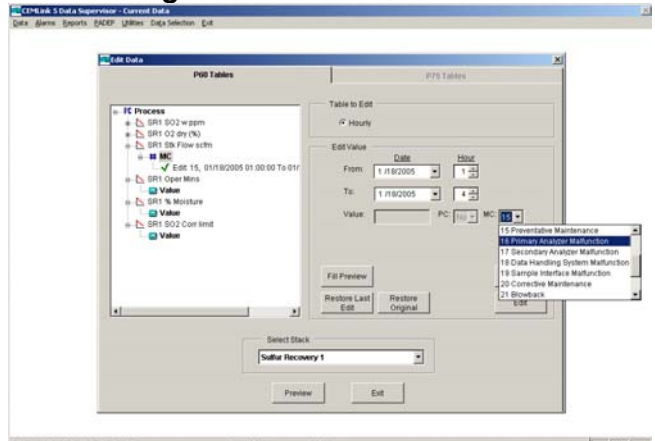

➤ **Enhanced Trending Features**

As a leading supplier of CEMS/DAS software, VIM Technologies, Inc. is committed to product excellence. Over the years we have introduced small generational changes to **CEMLink™** in response to regulatory changes, evolving software standards & general demands from the industry. VIM Technologies, Inc. has made a quantum leap in air compliance software with its development of **CEMLink™ 5**.

Some of the added features & benefits of **CEMLink™ 5** include:

- 100% VIM Technologies, Inc. product based on OPC communications and true Windows 32 bit applications
- User Manager with individual Username, Password, and Privileges
- Ability to mix values from multiple PLCs on the Overview, Real Time, Hourly & Trend Screens
- Simultaneous editing of common data fields for multiple stack configurations
- On-The-Fly Operator configurable Screen Displays
- Enhanced Operator Screens
- Enhanced Data Browser
- Enhanced Data Editing Utilities
- Enhanced Data Corruption Protection
- Enhanced Multi User Capability
- Enhanced Data Report Navigation
- Enhanced print to screen report preview capabilities
- Optional Audit Screens for Linearity & CGA Tests
- Optional PDF Report Writer
- Optional Email alert functionality

**Data Editing**

➤ **Enhanced Data Editing Utility**

**Data Browser**

➤ **Enhanced Data Browser offers easy access to data.**

**Choices**

Our goal is to be the CEMS industry’s only choice for DAS systems. VIM Technologies, Inc. wants to give every customer the opportunity to share in the benefits of this exciting development in software innovation. All customers operating previous versions are encouraged to consider an upgrade to **CEMLink™ 5**. For more details about the next generation DAS, contact us through our website at [www.vimtechnologies.com](http://www.vimtechnologies.com).
