CEMLink™ 5 Product Launch

VIM Technologies, Inc. is pleased to announce the full market launch of our fifth generation air compliance data acquisition system – **CEMLink™ 5**. This VIM developed product has been in commercial operation for the past fourteen months, successfully reporting air emissions data from a variety of sources. **CEMLink™ 5** is a quantum leap in DAS software innovation and design.

CEMLink™ 5 had a spectacular showing at several key industry events in 2002. In January, we held an introductory product launch at the 5th Annual Electric Utilities Environmental Conference (EUEC) in Tucson, AZ.

We followed up with a full market launch in May at the EPRI CEMS User Conference in Chicago, IL and in June at the 95th

Typical Das Overview Screen

Annual AWMA Show & Conference in Baltimore Md. Over 2,500 people have spent time with **CEMLink™ 5** as a result of these conferences. Plans are in the works to expose more end users to this innovative new DAS at several more venues.

Contact us at sales@vimtechnologies.com to find out more or to set up a site specific DAS assessment or for a product demonstration.

CAMD Division Releases EDR v2.2

The Clean Air Markets Division (CAMD) has decided to create EDR v2.2 to support the most recent changes to the Acid Rain regulations. Revisions to the Rule were finalized on June 12, 2002. New record types supporting sources of a particular type and mode of operation are required, which drove

the decision to release a second reportable version of the EDR. EDR v2.2 applies to the special cases. EDR v2.1 is still valid for most Acid Rain Sources.

Please visit www.epa.gov/airmarket/reporting/edr21/index.html for full details. Final posting of the new instructions was Aug. 2002.

From the President's Desk

The staff of VIM Technologies, Inc. and myself would like to welcome our long term partners and our new sources to the first Issue of **CEMLink™** Emissions Monitor. Our goal of establishing ourselves as the premier air compliance data acquisition company is developing according to plan, and we are very excited by all of the opportunities that the future will bring.

We are also very excited about the recent development and implementation of our latest software product,

CEMLink™ 5. This new generation of **CEMLink™** opens the software architecture up to a series of new features and options that simply were not possible in this industry in years past. We have developed this latest version with end-user input and the internal expertise of our staff, and our over ten years of experience providing quality compliance data acquisition systems.

We look forward to providing you with the best software solutions available in the air compliance industry today.

Keep in mind, no matter what the need, VIM Technologies, Inc. is standing by to assist you with your air compliance needs. Please do not hesitate to call on us.

You are always welcome to contact me directly at 410-859-5455 or matt.caldwell@vimtechnologies.com

Sincerely– Matt Caldwell

Totally Optional – PDF Formats & Automatic E-mail

CEMLink™ 5 simplifies the reporting process by offering the end user an option to add PDF formats to their Report Print Menu. PDF formats have become an industry standard for simplifying the transfer of text information and reports electronically, as a read only file. By adding the PDF Report Utility, you now have the option of printing your reports to the screen, to the designated paper printer or to a file in a PDF format.

All the available reports in your Data Supervisor can be written this way. Files created with this option can easily be distributed via email to plant personnel, corporate contacts and regulatory agencies. The process is simplified with **CEMLink™ 5**.

Do you wish you could arrive at your office every day and have all your necessary re-

ports sitting in your E-Mail's Inbox?

With the automatic E-Mail Utility option of **CEMLink™ 5** this is a reality! Setup a list of E-Mail recipients and select which reports you want and when & viola! The automatic E-Mail Utility will automatically distribute this information in either PDF or XLS format.

The Leading Edge

CEMLink™ 3 and CEMLink™ 4 Users are converting to CEMLink™ 5

Many end users are taking advantage of the expanded features & benefits of the new **CEMLink™ 5** software and upgrading now. Upgrade packages are being tied into requests for new PC

Hardware, changes to compliance reporting structures, general DAS system modifications and maintenance contract renewals. VIM Technologies, Inc. wants to offer each client the opportu-

nity to develop a cost effective upgrade of their existing system in order to take advantage of the enhanced performance of **CEMLink™ 5**. Call today for more information or a budgetary quote.

CEMLink™ 5 is a big hit in NOx SIP Call Additions

Facilities that are currently using **CEMLink™** for their non-NOx SIP Call affected units are turning to **CEMLink™ 5** to support their NOx SIP Call monitoring. New sources seeking a long term DAS solution for their NOx

SIP Call reporting are turning to VIM for the answers. Due to the demand for our services in this market sector, we have deepened our service and support capabilities adding Monitoring Plans, QA/QC Plans, specification

development and regulatory analysis to our environmental engineering services. If you are in the market for these services please let us know and we will develop a cost effective solution that fits your needs.

CEMLink™ responds to the shift in the market

CEMLink™ is a full service DAS meeting the demands of all reportable air emissions requirements and has been responding to all the changes that the market demands. We have built utilities to support general permit changes, Title V specific reports, PI Interfaces, operational data require-

ments and a number of site-specific needs. If you are evaluating changes or enhancements give us a call as we have the software solution for you.

Changes in site specific regulatory requirements present opportune time to consider changing to **CEMLink™**

5. Cost effective upgrades tied to Title V Permit changes, Acid Rain Rule revisions and NOx Budget Program updates are giving sources good reasons to update their software. If you fall into any of these regulatory categories then now is a good time to consider an upgrade.

CEMLink™ On-Site Training keeps end users on top of things

One of the goals at VIM Technologies, Inc. is to allow our customers to have as much control of their DAS as they are able to handle. As part of this mission we have

stepped up our efforts to provide detailed on-site training on the **CEMLink™** systems. We offer everything from Operator to Administrator Training - from

refresher to master courses. Whatever your site specific needs, we have a training class for you. Call us today for details.

Call For Action– CEMLink™ User Group

VIM Technologies, Inc. has been entertaining the idea of a DAS User Group for some time. We have discussed venues tied to industry events, seasonal meetings in between critical reporting periods and a number of other ideas. We have established that this is something worth pursuing.

our belief that with concentrated effort between our end-users, and us we can continue to reach goals that are of mutual benefit.

Let us know your comments by phone, fax or email. Call me, *Matt Radigan*, personally at (781) 821-2376 or contact me via E-Mail at

matt.radigan@vimtechnologies.com.

Our goal is to have our first meeting within the next 6 to 12 months. Thanks and we look forward to hearing from you.

We are reaching out to you, our partners, for the answers. Please consider the following list of issues and let us know how you feel. It is

User Group Issues
1. I would participate in a User Group if you had one.
2. The EPRI CEMS User Group is the best venue for me to attend a DAS User Group
3. The AWMA Exhibit is the best venue to have a meeting.
4. The meeting should be held independent of industry events.
5. My expectation of the things we should accomplish as part of a User Group are.....
6. I expect a User Group to have a workshop atmosphere.
7. A User Group should meet 1, 2 or more times per year.

“Success is more a function of common sense than it is of genius” – An Wang

Survival Kit

VIM Technologies, Inc. is standing by to assist you in maintaining your DAS. We offer cost effective telephone maintenance contracts, designed to keep you well supported during critical times.

If you need an update to your existing contract or are unsure about the status of your current one – please contact Lynn Sample at our Quakertown office at (215) 538-2602 or by email lynn.sample@vimtechnologies.com
