COMPLIANCE OPTIMIZATION & MONITORING PERFORMANCE ACCURACY SERVICE

QA/QC PLAN SERVICES

The Compliance Optimization & Monitor Performance Accuracy Service (COMPAS) program has been developed to assist you in your air compliance needs. The fourth offering in the COMPAS suite of services is the QA/QC Plan Services. The objective of this service is to assist you in achieving your compliance goals by producing a Quality Assurance/Quality Control Plan for your continuous emissions monitoring system (CEMS) that meets the requirements of both the Part 60 and 75 regulations but goes far beyond those requirements in terms of providing your facility personnel a document that will be referenced on a daily basis and that will ensure that your vision for your CEMS is realized.

Does your current QA/QC plan merely gather dust on a shelf? Can your technicians even find it? Does your plan contain the information your team needs to operate your CEMS such that you will not receive any agency inspection citations? Is it time for a new approach? Then let the COMPAS team create a plan for you that works – a plan that is full of the information your team needs and, because it is so easy to use, your team members will use it!

The VIM COMPAS philosophy for QA/QC plans is that they are not merely repositories for information that the regulations require, but rather, that they are tools to help you reach full compliance. We accomplish this by providing the information your team needs in a task-oriented manner. Our QA/QC plan format is specially designed with readability and usability in mind. We use graphics for quick navigation, an easy-to-read text layout, and a crisp writing style to produce plan that accommodates the required elements while at the same time providing the information your team needs on both a day-to-day basis and a reference basis to keep your system in compliance.

There are many options for implementing the **COMPAS – QA/QC Plan Service** program. We can work with an existing plan and either make recommendations for improvements, or execute the improvements for you, or we can start “from scratch” with our unique plan format. Data gathering options can range from your personnel supplying markups, to phone interviews with knowledgeable team members, to VIM COMPAS staff visiting your site to gather the necessary information. You choose the option that works best for you!

Alone or combined with the other **COMPAS** offerings, **COMPAS** is a “win-win” partnership for you and for the VIM Technologies, Inc. staff, which is here to support you. **COMPAS** allows you to maximize your time, resulting in higher quality results without the pressure of having to know the details of the regulations. **COMPAS** gets you there – accurately and on time. **COMPAS** has been designed to offer a comprehensive support program that is tailored to meet your specific needs when the need arises. No matter which program you choose, you are supported and the extent of that support is fully in your control.

Questions or comments regarding this program or any other items outlined in this fact sheet may be directed to Rudi Muenster by calling (704) 852-9808 or by email at rudi.muenster@vimtechnologies.com.

COMPAS – QA/QC PLAN SERVICES

Finally: A QA/QC plan that works for you and helps you comply!
