

REFINERY REGULATORY OVERVIEW

ONLINE TRAINING

DATE: 1/20/2021

TIME: 1-4 PM EDT

DESCRIPTION: This course is designed to provide a thorough review of the Federal Air Quality Regulations applicable to refineries. Air Quality compliance for refineries has many layers. There are the applicable Federal regulations, state and regional requirements and possible consent decree obligations. Monitoring, record keeping and reporting requirements for 40 CFR Part 60 and RSR will be covered in detail. The course would be beneficial to environmental managers as well as Instrument & Control Technicians with CEMS responsibilities at refineries. The training would be valuable to personnel with limited Federal regulatory knowledge related to refineries as well as a refresher for more seasoned personnel.

KEY TOPICS INCLUDES:

CEMS Types

Part 60 Appendix B and F

RSR

- Part 60 Subpart J and Ja
- Part 63 Subpart UUU
- Part 63 Subpart CC

LEVEL: Beginner/Intermediate

PRICE: \$299.00

COURSE OUTLINE

3.0 Hours Sessions

Wednesday, January 20th (1:00pm-4:00pm EDT)

CEMS & Regulatory Overview

- * Summary of Applicable Regulations and Refinery Units
- * CEMS Types (dilution-extractive, extractive, insitu)
- * 40 CFR Part 60 Appendix B, Performance Specifications (Partial)
 - Performance Specification 1
 - Performance Specification 2
